**„Strahlentherapie und Onkologie“ –
official journal of the Slovak Society of Radiation Oncology**

Dear Professor Dubinsky,

First I would like to confirm, from the side of the Publisher, that we have been very pleased to learn about both your Scientific Society's interest in and the DEGRO's (Deutsche Gesellschaft für Radio-onkologie) approval for "Strahlentherapie und Onkologie" becoming the official journal also of the Slovak Society of Radiation Oncology.

As already mentioned to you by Professor Rolf Sauer (Editor-in-Chief) in his e-mail of the end of September the Slovak Society would be the 10th Scientific Association with "Strahlentherapie und Onkologie" as official journal. Members of these Associations can profit from the Publisher's special offer for optional subscriptions as follows:

For *individual subscribers* the annual rate is 279.45 EUR, plus Slovak VAT, but postage included, (regular rate is 520.-- EUR plus postage, i.e. almost double the reduced fee for your Society) and it comprises:

- delivery of 12 print issues of "Strahlentherapie und Onkologie" per year plus
- online access to the journal's complete archive, starting in 1997, via SpringerLink

Each issue of our journal contains a section of "Information from Scientific Associations" where, after approval by the Editor-in-Chief, also the Slovak Society of Radiation Oncology can publish information, e.g., announcements of scientific meetings, free of charge in either German or English language. – For more detailed information on, e.g., the journal's sections please see next page.

In case of questions concerning this offer please do not hesitate to contact us.

Best regards,

Dr. Elisabeth Renatus

Facts on

“Strahlentherapie und Onkologie”:

- Founded in 1912, the oldest oncological journal
- Covers all aspects of oncology with focus on radiooncology, radiation biology and radiation physics
- Publishes original articles, review articles, case studies, and short communications (peer-reviewed)
- Includes a literature review with annotated articles to inform on new developments in the various disciplines concerned

The articles are relevant not only to radiooncologists but to all physicians interested in oncology, to radiation biologists and radiation physicists.

Contributions are published in English or in German (optional). All articles have English summaries.

The journal is the official publication of several scientific radiooncological societies and publishes the relevant communications of these societies.

Online information on “Strahlentherapie und Onkologie” is available at www.sto.springer.de
